

# Hands-on Rain Garden Training: Landscaping for clean water & healthy streams

**\$20 registration fee includes training materials and lunch**  
**Tuesday October 26, 2010 – 9:00 to 5:00, location TBD**

Rain gardens are logical and beautiful solutions to managing stormwater on many properties. The purpose of the training is to help interested residents learn the skills needed to design, build and maintain rain gardens. This workshop will prepare you to serve as a local resource to other community members interested in building rain gardens. Resulting designs from the workshop will be applied to the forthcoming Newport Library Rain Garden demonstration project!

## Workshop Topics:

- overview of stormwater management
- site assessment
- rain garden sizing and design
- construction and maintenance
- plants appropriate for coastal rain gardens
- sustainable landscape construction materials

**Continued Education Hours available for State Landscape Contractors Board!**

**Trainers:** Robert Emanuel, co-author of the Oregon Rain Garden Manual, and Frank Burris - Oregon State University Extension Service and Oregon Sea Grant.

**Who should attend:** Gardeners, landscapers, local governments, watershed councils, business owners, and building professionals. Dress for both indoor and outdoor training components.

**When:** Tuesday, October 26, 9:00AM - 5:00 PM  
*Please register by Friday October 22\**

**Where:** Coos Bay location TBD
